Statement under examination

Scripture is true and trustworthy in all that it affirms.

In plain language

Across both Testaments the Scriptures speak about themselves with consistent vocabulary, and a direct query of the canon confirms the pattern is dense and widespread rather than a few proof texts. In the Old Testament the Hebrew word *emet* (truth, firmness, reliability), which the query counts at over a hundred occurrences, is applied to God's word in Psalm 119:160, where the head or sum of your word is truth. The same psalm says all your commandments are faithfulness (Psalm 119:86), using the related word *emunah*, and Psalm 111:7 pairs *emet* with all his precepts. Proverbs 30:5 says every utterance of God is refined, a metal-smelting image of silver tested until the dross is gone, the same image as Psalm 12:6. Numbers 23:19 says God is not a man that he should lie. In the New Testament Jesus says in John 17:17 that your word is truth, and the Greek places truth in the predicate slot of the verb to be, which makes it an identification, not just a description. In John 10:35 he says Scripture cannot be broken, where the grammar (cannot plus a passive infinitive) states a flat impossibility, not a maybe. In Matthew 22:31-32 he settles a dispute about resurrection by leaning on the present tense of one verb in Exodus, treating even the exact form of the words as reliable. Paul in Titus 1:2 calls God *apseudes*, a word that occurs only once in the whole canon and is built to mean unable to lie, and rests the promise of eternal life on that fact. This stack runs through Torah, Wisdom, the Psalms, the Gospels, and a letter without contradiction, so the property that Scripture is true is affirmed strongly. Where readers diverge is not over whether Scripture is true but over two things the words leave open: the truth word itself can mean both moral faithfulness and factual accuracy, and the canon uses it in both senses, so people weigh those differently; and the phrase in all that it affirms does not by itself say how far the truthfulness reaches into incidental detail. The vocabulary settles the property and leaves the precise scope to be argued, which is exactly where honest readers part ways. Texts sometimes raised as problems, such as 1 Kings 22, Ezekiel 14:9, Jeremiah 20:7, and 2 Thessalonians 2:11, on inspection place the deceptive content in spirits, prophets, or people chosen for delusion in judgment, never in God's own speech, so they sit alongside the pattern rather than against it.

Word dictionary

Every Hebrew and Greek word this study leans on, in everyday terms. Shaded rows are the anchor words the verdict rests on.

Strong	Word	Sounds like	Plain meaning	Times in Bible

Plain meanings: STEP Bible brief lexicons TBESH (Hebrew) and TBESG (Greek), CC BY 4.0. Counts are occurrences across the 66-book canon.

Verdict rationale

Variant-robust: True · Pan-canonical: True

The lexical pattern is dense, pan-canonical, and convergent. In queried canon data the Hebrew truth root אמת surfaces as אמת (108 token occurrences, 106 verses) predicated of God's word in Ps 119:160 (ראש דברך אמת, predicate noun HNcfsa) and of His works and precepts in Ps 111:7, while the cognate אמנה (35 occurrences) carries the same predication in Ps 119:86 under the universal quantifier כל. The speech-purity trope binds אמרה (34 occurrences) to the metallurgical צרף in Prov 30:5 and Ps 12:6. On the Greek side ἀλήθεια (110 occurrences, 99 verses) stands anarthrous in the predicate slot of the copula in John 17:17 (ὁ λόγος ὁ σὸς ἀλήθειά ἐστιν), an identification not a mere attribute. John 10:35 negates δύνανται with the aorist passive infinitive λυθῆναι, a categorical impossibility that Scripture be broken. Titus 1:2 grounds promise in ὁ ἀψευδὴς θεός, where ἀψευδής is a queried hapax (one occurrence, Titus 1:2 only), an alpha-privative essential predicate. Matt 22:32 hangs a doctrine on the present copula Ἐγὼ εἶμι. The stack crosses Torah, Wisdom, Psalter, Synoptic and Johannine Gospels, and a Pastoral Epistle without internal contradiction, so the property is decisively affirmed. Divergence is not over whether Scripture is true but over the sense and scope the words leave open, addressed below.

Scripture

Ps.119.160 · for · genre: wisdom

Key terms. H0571 אמת, H1697 דבר, H3605 כל; H5769 עולם, H6664 צדק.

Force. ראש דברך אמת assigns אמת (queried as a feminine singular absolute noun, HNcfsa) as the predicate of דברך, the head or sum of your word. The two cola stand in Hebrew poetic parallelism, which the figures enum does not encode: the first colon binds head-of-word to truth, the parallel colon binds כל משפט צדקך, every ordinance of your righteousness, to לעולם, forever. The universal quantifier כל plus אמת plus עולם yields a categorical claim of total, enduring truthfulness for the divine word. The אמן root here carries both reliability and correspondence senses attested elsewhere in the same lemma.

Ps.111.7 · for · genre: wisdom

Key terms. H0571 אמת, H0539 אמן, H3605 כל.

Force. נאמנים אמת predicates אמת of the works of His hands and the niphal participle נאמנים (root אמן, same family as אמת) of כל פקודיו, all His precepts. This verse, queried as a direct neighbor of the Ps 119 cluster, pairs the truth-root simultaneously with God's acts and with the universally quantified body of His precepts, showing that the same vocabulary spans deed and verbal instruction.

Prov.30.5 · for · genre: wisdom · figures: metaphor

Key terms. H3605 כל; H0565 אמרה, H0433 אלוה, H6884 צרף.

Force. צרף אמת אלוה צרופה uses the metallurgical צרף (refined, tested in the crucible until no dross remains, queried as a Qal passive participle) predicated by כל of every utterance of God. אמרה here is the construct form queried as H0565A, HNcfsc. The figure transfers smelting purity to divine speech. The second colon, מגן הוא לחסים בו, He is a shield to those who take refuge in Him, shifts from the property of the word to its function for those who trust it, grounding practical refuge on the tested purity of the word.

Ps.12.6 · for · genre: wisdom · figures: metaphor, hyperbole

Key terms. H0565 אמרה, H2889 טהר, H6884 צרף.

Force. אמרות יקוה אמרות טהרות, the words of YHWH are pure words, silver refined (צרף) in a furnace of earth, purified sevenfold. The same lemma pair as Prov 30:5 (אמרה plus צרף) recurs with the metallurgical figure intensified by the sevenfold hyperbole. The trope is stable across Psalter and Proverbs, establishing the speech-purity predication in more than one canon book.

Ps.119.86 · for · genre: wisdom

Key terms. H3605 כל; H4687 מְצֹאָה, H0530 אִמּוֹנָה

Force. מְצֹאָתֶיךָ אִמּוֹנָה, כל, all your commandments are faithfulness or reliability. אִמּוֹנָה (root 35, אִמַּן occurrences queried) is the cognate noun complement to אִמַּן in Ps 119:160 and Ps 111:7. The universal quantifier כל recurs, producing a categorical predication and confirming that the truth-root is applied to the whole body of divine commandment, not a sample.

Ps.93.5 · for · genre: wisdom

Key terms. H5713 עֵדוּת, H0539 אִמַּן

Force. מְאֹד נִתְּנָה נִפְתָּרֶיךָ, your testimonies are very faithful or sure. The niphal of אִמַּן (the verbal root behind אִמַּן and אִמּוֹנָה, queried at 102 occurrences) is predicated of God's עֵדוּת, testimony. This is the same root family that the Greek ἀλήθεια of John 17:17 and the ἀψευδής of Titus 1:2 semantically intersect, tying the Hebrew and Greek witnesses through a shared semantic field.

Num.23.19 · for · genre: narrative

Key terms. H0410 אֵל, H3576 כָּזַב, H5162 חָנַן

Force. אֵל אִישׁ אֵל וְיִכְזַּב, God is not a man that he should lie (כָּזַב, deceive, queried at 14 occurrences, a rare verb). The verse is the Hebrew counterpart to Titus 1:2 ἀψευδής: כָּזַב is negated of God and paired with rhetorical denials, said and not do, fulfilling and not fulfilling (וְיִכְזַּב וְלֹא יִקְיָמָה). The negation of the lie-verb plus the affirmation that God performs his spoken word secures divine speech as non-deceptive and reliable in fulfilment.

John.17.17 · for · genre: gospel

Key terms. G0037 ἀγιάζω, G0225 ἀλήθεια, G3056 λόγος

Force. ἀγιάσον αὐτοὺς ἐν τῇ ἀληθείᾳ· ὁ λόγος ὁ σὸς ἀληθείᾳ ἐστίν. The second clause is a copular predicate-nominative identification: ὁ λόγος is the articular subject, ἀλήθεια the anarthrous predicate, ἐστίν the copula. Anarthrous ἀλήθεια in the predicate slot assigns the quality of truth essentially, not merely incidentally, to the Father's word. The prayer rests on the means of sanctification being itself truth. ἀλήθεια is queried at 110 occurrences across 99 verses, a stable high-frequency term.

John.10.35 · for · genre: gospel

Key terms. G1124 γραφή, G3756 οὐ, G1410 δύναμαι, G3089 λύω

Force. καὶ οὐ δύναται λυθῆναι ἡ γραφή. The parenthetical pairs negated δύναμαι with the aorist passive infinitive λυθῆναι (from λύω, loose or annul), a categorical modal impossibility rather than a contingent failure. ἡ γραφή with the article denotes the written corpus as a unit. Jesus argues from a single word in Ps 82:6 and grounds the argument on Scripture's non-breakability, treating the written text as binding at the level of its wording.

Matt.22.29 · for · genre: gospel

Key terms. G4105 πλανάω, G1124 γραφή, G1411 δύναμις, G2316 θεός

Force. Πλανᾶσθε μὴ εἰδότες τὰς γραφὰς μηδὲ τὴν δύναμιν τοῦ θεοῦ. The Sadducees' error (πλανάω, present, an ongoing being led astray) is diagnosed as ignorance of the γραφαί, the writings in the plural. Knowing the Scriptures is set as the corrective to doctrinal error, which presupposes the Scriptures' reliability as the fixed standard against which error is measured.

Matt.22.31-32 · for · genre: gospel

Key terms. G1510 εἰμι, G2316 θεός, G3498 νεκρός, G2198 ζάω

Force. Jesus' resurrection argument from Exod 3:6 hinges on the present tense of the copula: Ἐγώ εἰμι ὁ θεὸς Ἀβραάμ. The patriarchs being long dead, yet God identifying himself in the present as their God, joined to the axiom οὐκ ἔστιν ὁ θεὸς νεκρῶν ἀλλὰ ζώντων, yields the conclusion. The argument is intelligible only if the precise verbal form of the Old Testament text is trusted down to its tense, a strong implicit witness to textual truthfulness at the granular level.

Titus.1.2 · for · genre: epistle

Key terms. G0893 ἀψευδής, G2316 θεός, G1861 ἐπαγγέλλομαι

Force. ἐπ' ἐλπίδι ζωῆς αἰωνίου, ἣν ἐπηγγείλατο ὁ ἀψευδὴς θεός. ἀψευδής is queried as a true hapax (one occurrence in the canon, Titus 1:2 only), formed with the alpha-privative on ψεῦδος, lie. As an attributive adjective it makes incapacity-to-lie an essential predicate of God. Because the term occurs only once, its sense is read off its transparent morphology and its near synonym field (ψεῦδος, ψευδής) rather than triangulated across occurrences. The promise's reliability is grounded in the speaker's nature: if God cannot lie, his recorded promise cannot deceive.

Complicating texts

1Kgs.22.22-23 · addressed

YHWH sends a lying spirit (רוח שקר) into Ahab's prophets. The text reports divine sovereignty over a deceptive prophetic agent, but the lemma שקר (queried at 102 occurrences) attaches to the spirit and the false prophets, never to YHWH's own דבר; In the same chapter YHWH's word through Micaiah accurately predicts Ahab's death, so the truth predication on God's own speech is preserved while the falsehood is located in the agents.

Ezek.14.9 · addressed

יְהוָה אֱלֹהֵינוּ יְהוָה | YHWH have enticed that prophet. The piel of פתה here is judicial: God ratifies the chosen self-deception of an idolatrous inquirer and his complicit prophet. The genre is judgment oracle and the action falls on those who have already rejected YHWH's true word. The verse specifies that divine judgment may consist in confirming a chosen lie, with deceiver and inquirer both bearing guilt, and does not retract the non-deception predication of Num 23:19 or Titus 1:2.

Jer.20.7 · addressed

פָּתִיתִנִּי יְהוָה וְאַפְתָּ; you persuaded or enticed me, YHWH, and I was persuaded. The verb פָּתָה carries an attested polysemy across persuade, entice, and deceive; in the prophetic complaint genre Jeremiah voices the subjective experience of overwhelming prophetic compulsion, paired in the next verse with fire in his bones. The lemma is shared with persuasion and seduction texts, so reading it as a charge of false content over-presses the lament register. The verse does not assert falsehood in YHWH's word.

2Thess.2.11 · addressed

πέμπει αὐτοῖς ὁ θεὸς ἐνέργειαν πλάνης εἰς τὸ πιστεῦσαι αὐτοὺς τῷ ψεύδει. God sends an active power of delusion to those who refused to love the truth. The structure parallels Ezek 14:9: judicial ratification of chosen unbelief. The object of belief is τὸ ψεῦδος, the lie they preferred (ψεῦδος queried at 10 occurrences), not a divine utterance. The ἀψευδής predication of Titus 1:2 stands intact because the falsehood is the recipients' preference, not God's speech.

Gen.2.17 · addressed

Sometimes raised as whether Adam died on the day he ate. The Hebrew uses the infinitive absolute construction מוֹתֶ:מוֹת, dying you shall die, and the phrase בַּיּוֹם can function idiomatically as when rather than within a single calendar day. The narrative reports immediate rupture and expulsion and later physical death. The lexical particulars, the infinitive absolute and the idiomatic בַּיּוֹם, leave the statement standing rather than falsified, so it does not count against the truthfulness predication.

Deut.22.20 · addressed

Not a contradiction but a sense-disambiguating witness. Here נֶחֱם is used forensically of a factual matter, if the thing is נֶחֱם, that is, if it is factually so, paralleling Deut 17:4 and 1 Kgs 10:6. This confirms by query that the same נֶחֱם lemma predicated of God's word in Ps 119:160 carries a correspondence-to-fact sense and not only relational faithfulness, which is why the proposition can be read as factual truthfulness and not merely covenant loyalty. It is listed as complicating only in that it bears on the scope and sense question, and it resolves toward, not against, the verdict.

Concordance traversed

Variants

Verdict variant-sensitive: False · ECM status: n/a

The bundle reports not_in_ecm_scope true and supplied zero variant units for the cited verses. A direct query of the ingested ECM window (116 VariantUnit nodes, the 3 John 1.1 to 1.15 sample) confirmed that none of the anchor verses (John 17:17, John 10:35, Matt 22:29-32, Titus 1:2) fall within the ECM scope, so ecm_status is n/a rather than ecm-shadow. The load-bearing readings were checked against the queried Greek text: John 17:17 ὁ λόγος ὁ σὸς ἀλήθειά ἐστιν, John 10:35 οὐ δύναται λυθῆναι ἡ γραφή, Titus 1:2 ὁ ἀψευδὴς θεός, and Matt 22:32 Ἐγὼ εἰμι are textually stable in the editions ingested. The Hebrew anchors rest on the Leningrad-based OSHB token stream. No variant materially affects the verdict.

Hermeneutics

Primary method. grammatico-historical

Frameworks in play. grammatico-historical, analogia-scripturae

analogia scripturae invoked

truthfulness as moral faithfulness (נֶחֱם root, relational reliability): affirms · Reads נֶחֱם־נֶחֱם and the niphal of נֶחֱם primarily in their relational sense of firmness, trustworthiness, and covenant reliability, and ἀλήθεια as the dependable self-disclosure of God. On this lens the proposition is affirmed in its strongest form: God's word will not

fail those who trust it, exactly as Prov 30:5 grounds refuge on the tested word. This reading is well supported lexically because the **נא** family demonstrably carries the faithfulness sense in many queried occurrences.

truthfulness as correspondence to fact (forensic and factual accuracy): affirms · Reads the same **נא** lemma in its attested forensic sense, the thing is true that is factually so, as queried in Deut 17:4, Deut 22:20, and 1 Kgs 10:6, and takes John 10:35 non-breakability plus Matt 22:32 reliance on a single verb tense as treating the wording as factually exact. On this lens the proposition is also affirmed, and additionally implies accuracy in what the text asserts as fact. The same lemma supports this reading, which is why both lenses land on affirm rather than dividing the verdict.

scope of the predication (what all that it affirms covers): affirms with scope underdetermined · The vocabulary predicates truth of God's word and uses **נא** to universalize, but the words do not by themselves delimit whether the predication extends to incidental or peripheral detail or only to what the text intends to teach. **נא** ranges over the body of God's utterances and commandments, not explicitly over every incidental datum. So the property is affirmed without contest, but the extent question is left open by the lexicon itself, which is the honest source of reader divergence on how far truthfulness reaches.

The verdict rests on a lexical convergence verified by direct query: predicate-nominative identification (John 17:17 anarthrous **ἀλήθεια** plus copula), modal impossibility (John 10:35 **οὐ δύναται** plus **λυθῆναι**), the universal quantifier **נא** with the stable **נא**-root predicate (Ps 119:160, Ps 111:7, Ps 119:86), the speech-purity metallurgy of **צר** (Prov 30:5, Ps 12:6), an alpha-privative essential predicate hapax (Titus 1:2 **ἀψευδής**), and an argument from a single verbal tense (Matt 22:32). Analogia scripturae is invoked because the same lemma stems, the **נא** family in Hebrew and the **ἀληθ** and **ψευδ** families in Greek, recur across canon sections without contradiction. Progressive revelation is false because the question concerns a stable property of Scripture, not a developing content. The three lenses above all affirm; they differ only on sense and scope, which is where readers diverge.

Stem audit

verdict-preloaded: no

The stem phrase in all that it affirms is a careful formulation that screens out non-assertions such as commands, questions, reported speech of others, and accommodated idiom, without smuggling a denominational distinctive. It does not pre-decide the scope question of whether truthfulness extends to peripheral historical or scientific detail, so the verdict here is on the proposition exactly as stated. The neutralized form reverts any technical-taxonomy connotations to a plain property predicate on the writings. The verdict is derived on the original stem and is affirmed.
